Research Interests

To engineer immune-instructive materials for cancer and inflammatory disease, and to advance science communication that keeps such therapies intelligible to the public they are built for.

- **Stem cell-based immunomodulation.** Immunosuppressive capacity of mesenchymal stromal cells; efferocytosis-driven immunosuppression in monocytes and their macrophage progeny; iPSC-derived model systems.
- **Nanomaterials.** Radiation-responsive scintillating nanoparticles for X-ray-triggered uncaging; non-viral polymer nanocomplexes for CAR-TAM engineering.
- **Bioinformatics and *in silico* modeling.** HER2-ADC response prediction from endocytic trafficking biology; RNA-seq analysis of therapy-induced tumor immune remodeling; structure-based drug repurposing for radiation-activated payloads.
- **Environmental exposure and immune function.** Pb, PCBs, and PFAS as modifiers of antigen presentation and cellular immune response.

Education

Korea University | Seoul, Republic of Korea

B.S. in Health and Environmental Science

B.E. in Biomedical Engineering (dual degree, admitted Nov 2023)

Mar 2022 – Feb 2027

(expected)

University of Iowa | Iowa City, IA, USA

Exchange Student, Roy J. Carver Department of Biomedical Engineering

Aug 2025 – May 2026

Research Experience

Nano-Biomedicine Lab, Korea University (PI: Mikyung Kang)

Undergraduate Researcher

Seoul, Korea

Jun 2026 – Present

- **Radiation-activated immunotherapy** (KIRAMS and Harvard Medical School collaboration)
 - Synthesized **inorganic nanoparticles** that convert X-ray energy into UV emission to cleave a UV-labile linker.
 - Designed the **in silico drug repurposing** workflow used to identify an IL-2-mimetic docking system.
- **Propagation of MSC-induced immunosuppression to macrophages**
 - Tested whether the immunosuppressive phenotype of **efferocytic macrophages** propagates to bystander macrophages through exosome-mediated transfer.
- **HER2 ADC response prediction** (KIST molecular imaging collaboration)
 - Analyzed GEO datasets to prioritize **biomarkers** of **T-DXd** and **T-DM1** response.
 - Tracked antibody internalization and **lysosomal degradation** by immunocytochemistry and confocal imaging.
 - Built a **predictive mathematical model** linking trafficking-gene expression to ADC response.
- **CAR-TAM drug factory** (Korea University, Kyung Hee University, and Yale Cancer Center collaboration)
 - Developed the **non-viral delivery system** replacing lentiviral vectors, using PEI-plasmid nanocomplexes that deliver CRISPR-Cas9 and an HITI donor for single-step **SIGLEC10 knockout and CAR knock-in**.
- **Environmental immunotoxicology**
 - Designed a study asking whether non-cytotoxic **Pb** exposure impairs **phagolysosomal** antigen processing and antigen-specific **CD8⁺ T-cell activation** in DC2.4 dendritic cells.

Ankrum Lab, University of Iowa (PI: James Ankrum)

Undergraduate Research Intern

Iowa City, IA

Aug 2025 – May 2026

- **Efferocytosis of cytokine pre-licensing of MSCs**
 - Showed that **cytokine pre-licensing of MSCs** elicits the efferocytic response of primary human monocytes, with downstream **suppression of T-cell proliferation**; led manuscript preparation.
 - Validated the five-color monocyte/macrophage phenotyping panel (CD14, CD16, CD86, CD163, CD206) on flow cytometry and performed all FlowJo analysis.
 - Quantified secreted TNF- α , IFN- γ , IL-10, and IL-4 using ELISA.
- **Subacute PCB inhalation toxicology** (with Prof. Andrea Adamcakova-Dodd)
 - Ran the murine inhalation exposure study on PCB1254 combined with a Western diet.
 - Performed mice necropsy and multi-organ harvest, followed by nucleic acid extraction and PCR.
- **Single-cell energy metabolism of islet alpha and beta cells** (SCENITH, with Prof. Yumi Imai)
 - Analyzed SCENITH flow cytometry measuring puromycin incorporation as an index of ATP production in intact mouse islets under glucose and fatty acid deprivation.
 - Resolved alpha cells and two beta cell subpopulations by puromycin signal and confirmed them as physically distinct populations by back-gating onto FSC/SSC.

ChEEHR Lab, Korea University (PI: Yoon-Hyeong Choi)

Undergraduate Researcher

Seoul, Korea

Mar 2024 – Sep 2024

- Analyzed post-disaster exposure data from the **Humidifier Disinfectant Incident** for national health risk assessment.
- Curated heavy metal exposure data and performed the epidemiological analysis.

Invited Talks

[6] **D. Chae**, Senior Learning Strategy Lecture, 2026 Learning Support Lecture and Workshop Series, Center for Teaching and Learning, Korea University, Seoul, Korea. (2026, October). Invited lecture; selected as an outstanding graduating student.

[7] **D. Chae**, Korea–U.S. High-Tech Industry Youth Exchange Program Annual Seminar, KIAT, Seoul, Korea. (2026, July). Invited reflection talk.

Honors & Awards

President’s Award, Korea Institute for Advancement of Technology (KIAT) Most outstanding student of the Korea–U.S. High-Tech Industry Youth Exchange Support Program.	May 2026
Minister’s Award, Ministry of Trade, Industry and Energy (MOTIE) For science communication as a member of the 3rd KORUS 70 Press Corps.	Jan 2026
Excellence Award, ResearchThon, AI BioX ConfEX Grand Summit PHNYX × Cheiron × K-BioX “Development of an Adapter System to Minimize Air Contamination during Venous Blood Gas (VBG) Sampling.”	Jan 2026
Final Outstanding Team, B.I.O. Biotechnology Joint Academic Society Korea University × Yonsei University	Jun 2025
Grand Award (Best Poster Presentation), K-BioX Summit 2025 Yonsei University × Rutgers University × HTAN × G1’s Lab	May 2025
Outstanding Team, COCF, National Climate Initiative Competition	Sep 2024

Skills & Techniques

Cell culture	ucMSC, PBMC, Monocyte isolation, THP-1 and THP-1-derived macrophages, DC2.4, NR8383, iPSC, adipocyte
Functional assays	Efferocytosis assays, T-cell suppression (CFSE), macrophage polarization and phenotyping, LDH/CCK-8 viability assays
Immunoassays	Flow cytometry and FlowJo, ELISA, SDS-PAGE, Western blot, Immunocytochemistry, Bradford/BCA assays
Molecular biology	Nucleic acid extraction, RT-PCR and qPCR, primer design, plasmid preparation, electroporation
In vivo	Murine inhalation exposure system operation, necropsy and multi-organ harvest, brain tissue dissection, brain cell isolation
Nanomaterials	Core/shell lanthanide scintillating nanoparticles, mesoporous silica and iron oxide nanoparticles, carboxydextran conjugation and surface functionalization, LNP and PEI polyplex formulation, pre-PEGylated NLS-EEP synthesis, DLS/ELS, FT-IR, NanoDrop, ferrozine assay
Imaging	Confocal microscopy, fluorescence live-cell imaging with membrane and organelle trackers, lipid staining
Data Analysis	R (Bioinformatics; bulk RNA-seq, GEO analysis, gene module construction), MATLAB, SPSS *ADsP (Advanced Data Analytics Semi-Professional) certified, Korea Data Agency (2025, March).
In silico	Structure-based drug repurposing: AlphaFold 3, hotspot identification, AutoDock Vina virtual screening
Visualization	BioRender, Rhino 3D, ImageJ, Affinity.

Teaching & Extracurricular Activities

Volunteer World Vision, CHA Gangnam Medical Center, IHCO Over 120 hours of English–Korean translation for sponsored children’s correspondence and workshop leadership for new volunteers; pediatric and emergency department support and monthly rural mobile clinic visits.	Jan 2024 – Present
Academic Consultant Modeun Education Advise high school students on research-based academic portfolios, inquiry report design, personal statements, and admissions interviews; design one-to-one curricula.	Dec 2023 – Present
Press Corps Member (3rd Cohort, selected nationally) KORUS 70 / MOTIE Produced video and wrote columns on Korea–U.S. STEM research exchange for a general audience.	Jul 2025 – May 2026
Global Ambassador, SIMTOMI Mediark, medical AI healthcare startup Promoted a medical AI application through video content and marketing campaigns built around narrowing gaps in access to care; represented the platform to international student and researcher communities.	Aug 2025 – Oct 2025
Project Coordinator, B.I.O. Joint Academic Society Korea University and Yonsei University Led team BMN2 through an interdisciplinary immunology literature review and discussion project.	Feb 2025 – Jun 2025
Vice President, Environmental Health Science (EHS) Society Korea University Directed the society across the three fields of industrial health and safety, organizing public health campaigns and campus-wide risk assessment projects.	Mar 2024 – Jan 2025
Lead Guitarist and Organizing Committee TRUSS, Korea University student rock band Performed electric guitar in six live shows over two years; organizing committee member for rehearsal scheduling, venue logistics, and stage production.	Mar 2023 – Jan 2025
Mathematics Instructor Megastudy Taught over 200+ students across 10 schools; developed lesson plans, lecture materials, and visual content for the national e-learning platform.	May 2022 – Dec 2024
Climate Policy Researcher, Climate Scouts (9th Cohort) COCF, non-profit foundation Delivered carbon-reduction education to elementary and middle school students, and enacted a carbon credit policy proposal to the Ministry of Environment.	May 2024 – Sep 2024

Scholarships

STEM Talent Growth Pathway Program Ministry of Education / National Research Foundation of Korea Undergraduate research scholarship of KRW 1,000,000 (~USD 700) per month (renewal anticipated)	Sep 2026 – Feb 2027
Udeok Foundation Scholarship Hanil Cement Merit- and need-based award of KRW 4,500,000 (~USD 3,200) per semester over four semesters (USD 13,000 total)	Mar 2024 – Graduation
Korea–U.S. High-Tech Industry Youth Exchange Scholarship (3rd Cohort) KIAT / MOTIE Selected on academic merit and potential contribution to Korea's STEM industry (USD 9,000)	May 2025 – May 2026

Languages

Korean (Native Speaker) | **English** (TOEFL 5.0/6.0 equivalent to 100/120) | **Chinese** (HSK Level 2)
